

GreenChain AI — Audit & ESG Sustainability Report

Company: **Electro-Recycle** | Generated: 30 July 2026 | Reporting basis: All recorded GreenChain AI transactions to date

Circularity Rating

● Emerging

Rating reflects total verified transaction volume and cumulative CO2e avoided through GreenChain AI's industrial resource exchange platform.

Environmental Impact Summary

Metric	Value
Total Transactions Recorded	1
Total CO2e Avoided	50,350.0 kg
Total Landfill Diversion	4,500.0 kg

Material Breakdown

Material Type	Total Quantity (kg)
Metal	5,000.0

Transaction Log (Most Recent)

Contract ID	Material	Qty (kg)	CO2e Saved (kg)	Date
GC-80501458	Metal	5000.0	50350.0	2026-07-29

Methodology: CO2e avoided is calculated using material-specific emission factors referenced from EPA's Waste Reduction Model (WARM). This report reflects transactions recorded on the GreenChain AI platform only and is intended to support, not replace, formal ESG disclosure processes (e.g. BRSR, CSRD).
